

# Use Case - Manufacturing

Cellular IoT connectivity is transforming the manufacturing sector through real-time monitoring, predictive maintenance and a more agile and responsive working environment. MSP's offering IoT solutions can allow manufacturers to adopt innovative technologies and drive efficiency across their entire production system.

## What are the benefits of providing cellular IoT connectivity for manufacturing?

### ✦ Supply chain visibility

Cellular IoT connectivity contributes to end-to-end visibility in your client's supply chain. Monitoring the movement of goods from suppliers to production lines ensures improved logistics, reduced lead times, and better overall supply chain management.

### ✦ Real-time monitoring

IoT SIM cards enable your clients to implement real-time monitoring of machinery, production processes and inventory levels to ensure immediate awareness of any disruptions or deviations, helping minimise risks or issues to the supply chain.

### ✦ Predictive maintenance

Sensors embedded with IoT SIM cards can allow your clients to monitor the condition of their machinery and equipment, predicting potential failures before they occur. This helps in scheduling maintenance activities proactively, minimising unplanned downtime.

### ✦ Inventory management

For effective inventory management, sensors connected through cellular IoT allow your clients to accurately track raw materials and finished goods, preventing shortages and overstock situations.

## How can cellular IoT connectivity be used for manufacturing?

- ✦ Supply chain management
- ✦ Inventory tracking
- ✦ Quality control and assurance
- ✦ Machine monitoring
- ✦ Production line efficiency
- ✦ Energy management

## Why partner with Cellhire to provide IoT connectivity solutions?

- ✦ Access to the 4 leading UK networks
- ✦ International networks
- ✦ SIM Management portal
- ✦ Bespoke tariff capabilities & flexible terms
- ✦ White label portal
- ✦ Industry-leading billing and provisioning engine

Partner with Cellhire and offer your customers connectivity that meets the demands of critical IoT solutions. Using Cellhire's access to local, global & multi-network data, we can help create more conversations, deliver more services and ultimately secure new revenues.
