

Use Case - Healthcare

Cellular IoT connectivity used within healthcare helps to deliver improved patient care and efficiency as well as better cost savings and security compliance. MSPs offering IoT can empower healthcare providers to embrace a more connected and technologically advanced approach forming the future of healthcare services.

What are the benefits of providing cellular IoT connectivity for healthcare?

✦ **Enhanced patient care**

Devices embedded with an IoT SIM card allow your healthcare clients to implement remote patient monitoring solutions. This enables continuous tracking of vital signs, medication adherence, and overall health conditions, without manually checking monitors.

✦ **Security and compliance**

Most IoT connectivity solutions, like Cellhire, prioritise security measures through the correct encryption and authentication protocols. This ensures the protection of your client's sensitive data while being compliant with healthcare regulations.

✦ **Cost savings**

Through the provision of IoT connectivity, your healthcare clients can achieve cost savings in various areas including improved inventory management, reduced manual monitoring efforts and precautionary maintenance of medical equipment.

✦ **Patient engagement**

Cellular IoT connectivity enables the creation of smarter and more digitalised healthcare environments. Your client's patients can receive personalised notifications, access health-related information, and actively

How can cellular IoT connectivity be used for healthcare?

- ◆ Remote patient monitoring
- ◆ Emergency response systems
- ◆ Inventory management
- ◆ Smart medical devices
- ◆ Facility management
- ◆ Remote consultations

Why partner with Cellhire to provide IoT connectivity solutions?

- ◆ Access to the 4 UK leading networks
- ◆ International networks
- ◆ SIM Management portal
- ◆ Bespoke tariff capabilities & flexible terms
- ◆ White label portal
- ◆ Industry leading billing and provisioning engine

Partner with Cellhire and offer your customers connectivity that meets the demands of critical IoT solutions. Using Cellhire's access to local, global & multi-network data, we can help create more conversations, deliver more services and ultimately secure new revenues.
